

Explanations of Replacement Drawings

Replacement drawings for Figure 3, Figure 4, and Figure 5 are attached. In Figure 3, the lower panel has been edited to improve contrast such that the fluorescent GFP image is visible on a black and white printed version of the figure. In Figures 4 and 5, the changes are merely to bring the reference characters in the figure legends in line with the specification.

In Figure 4, the lower panels have been edited to improve contrast so that GFP emission is more visible in a black and white printed version. Furthermore, in the text of the caption, "CF0060_1" has been changed to "CG0060_1" to comply with the Office's request. The label "0060" above the panels has been changed to "50060".

In Figure 5, the contrast in all panels has been improved in order to make both visible light images and GFP images more visible in a black and white printed version. Furthermore, in the text of the caption, "CF0060_1" has been changed to "CG0060_1" to comply with the Office's request.
